

# Charging Gateway

Charging Gateway is a transport application for providing unified billing or charging to different value added services and call/ SMS service offerings. It helps the telecom operators to implement different services with little billing and charging effort as well as protecting the subscriber and operator from wrong charging.

## Feature of the product

- Content Specific Charging capability
- Subscription based charging ability
- Reverse charging is possible for both calls and SMS
- Charging can be done based on user group, time slots and slabs
- Data and SMS charging can be incorporated

## Benefits of the product

- It provides a way to collect, aggregate and store user session data
- Due to its store-and-forward capabilities there is no risk of data loss during network outage, mediation system outage or overload
- Supports third party interfacing
- Has a customer care and report management interface

## Highlights

- Charging logics are customizable in various ways, so it can easily incorporate operator's service mix
- Managing and integrating third party content/service provider is really easy due to charging gateway

Target Industry: Telecommunication Industry

“ Charging gateway has enabled us to offer our services to the customers in different charging modalities and attractive packages. Through the charging gateway, the user can be charged based on business logics, usage patterns and specific content usage. This solution has made multifaceted charging extremely easy; as a result, we can launch services with complex payment logics without a second thought. This solution is indeed a blessing for those operators who like to play around with rates and payment modalities. Its ability to integrate with third party interfaces and multiple SMSC has made content management much easier. ”

Adnan Bin Taj, Manager, VAS, CityCell

## Systems Solutions and Development Technologies Limited (SSD-TECH)

SSD-TECH is a software development company operating across the globe. It has proven its excellence by providing quality solutions to Large Enterprises, Telecom and Financial Institutions. Its presence in multiple industries enables SSD-TECH to come up with highly available and flexible solutions with complex business logics and high data volume handling capability. SSD-TECH has a skilled team to provide customized solutions, data warehousing and business intelligence services to transform organizational data into knowledge. Its optimum blend of technical and business expertise in its development centers at Bangladesh and Malaysia enables SSD-TECH to ensure smooth delivery of solutions to the customers.
